

SDG 3

Routing System

Fast and precise: several parallel consecutive flutes

Quickly: cut a tenon or do jointery

And accurately: installing hinges

Portability: for shop use and at the job site

Easily: routing a circle

GEAT - SDG 3 routing system is for crafts persons, carpenters, furniture and cabinet-makers, and woodworkers who up till now, have had to use complex hand-made templates.

GEAT - SDG 3 routing system is portable, flexible, accurate, and easy system to use in the shop and at the job site.

system can be used with any fixed base and plunge router with a guide bushing.

GEAT - SDG 3 will enable you to make precise mortise and tenons, other jointery, cut grooves, flutes, holes, even round and elliptical cut-outs quickly. You place your router between the rails, and it will accurately guided you router from the beginning to the end of the job.

GEAT - SDG 3 removes the need for time-consuming template construction.

GEAT - SDG 3 is made from an anodised aluminium profile, and can be precisely adjusted from 1/32" and extended to any length.

routing system has had very good technical reviews in the European press where it has been sold for years.

GEAT - SDG 3 beats CNC routers in making small-quantity production runs of products, and is less expensive than hand-made templates. Its high-quality design guarantees durability in the work environment.
